

FINISH CAMPAIGN STARTS TODAY FOR PRIMARY VICTORS

Hot Race Predicted Between the
Rival Candidates For the
Head of the Tickets

OFFICIAL TABULATION IS
HELD UP BY MORE DELAYS

Figures Issued By Advertiser
Sunday Morning Are Proved
To Be Accurate

With but a few weeks intervening between the final and primary elections, the political campaign will proceed today as warmly as if no primary fight had been settled Saturday. The county committee are preparing to organize and those retained on the ticket at the primaries are planning more and still more stamping tours of the islands.

The delay of several outside precincts in sending in their official ballots, prevented the official count from being announced by the city clerk yesterday. City Clerk David Kalanokalani and Manager Harry Murray of the water and sewer works, who kept close tabs on the returns at headquarters Saturday evening, both stated yesterday that the Advertiser's figures of the election are practically correct and can be accepted.

The Republican candidates for the offices of city attorney, city treasurer and city clerk having been overwhelmingly re-elected at the primaries, these offices are disposed of, and with the exception of several contests among supervisors the two great fights for the coming election are for the offices of mayor and sheriff.

It was generally conceded yesterday that the vote for Joel C. Cohen, the unsuccessful Republican candidate for the nomination as mayor, was strictly a Republican vote, and that Lane can secure it easily for the final. Cohen has no intention of doing anything to injure the chances of his successful competitor. It is announced.

Even without the Cohen vote, Lane led Fern, the Democratic nominee, by 290 votes, and if the Cohen vote is split equally between Lane and Fern at the election, Lane consequently still has the office. The chances are, however, that the great majority of those who cast their ballots for Cohen will vote for Lane. As shown in the primaries, the Republican vote for mayor was 4346 and the Democratic vote was 2387.

These figures practically narrow down the interest to the election for sheriff, which lies between Hopkins and Rose. On a straight party vote, Hopkins, as Republican candidate, will be elected, but the margin between him and Rose is so narrow that the primaries throw little light on the chances of either of them in the coming election. The votes cast for Wise, the unsuccessful Republican candidate are the deciding feature. If they are equally split up between Rose and Hopkins in the election, and the other vote remains the same, Rose will be re-elected.

This contingency is daily expected. Hopkins grows stronger daily as the electorate is getting better acquainted with him and he will have the undivided support of the Republican organization. He will probably be re-elected on the record of his opponent, said Republican leaders yesterday.

Wise's vote was 509. The total Republican vote was 3406 against 2911 Democratic vote.

It is generally conceded that the primaries foreshadow a Republican year, as the following summary of votes cast seems to show:

	Republican	Democrat
Mayor	4346	2387
Sheriff	3406	2911
City clerk	4693	1143
Auditor	5694	877
Treasurer	4227	2084
Attorney	4202	2282

These figures would indicate that the straight ticket was quite generally indulged in, in favor of the Republicans. Sheriff Rose only ran ahead of his party, backed as he is by a strong and unswerving political organization in the first place, in the second place by the traditional strength he borrows as being formerly "Bill" Jarrett's understudy, and probably, in the third place, by some secret vote-trading. Even with this he could not save himself from a party defeat.

It is very possible, it was admitted yesterday, that the board of supervisors will have two Democrats in it after July 2 next. The presence of William C. Achi on the Republican ticket helps the chances of William McClellan and Lester Petrie of the Bourbon camp.

If the supervisors had been running for election Saturday instead of for nomination, the seven highest, in the order named, would be as follows:

E. A. Mott-Smith, Republican, 3380.
Ben Hollinger, Republican, 3098.
Charles Arnold, Republican, 2208.
William McClellan, Democrat, 2471.
Lester Petrie, Democrat, 2435.
William Achi, Republican, 2213.
Charles Collins, Republican, 1935.

In other words, two Democratic candidates lead four of the Republican candidates. The two Republican candidates who would be dropped if this order is maintained at the next election will be Daniel Logan and William Achi. The absence of some precinct returns yesterday made it impossible to get the official number of the vote cast, upon which depends the figures stating whether or not City Clerk Kalanokalani, Treasurer Conkling and Attorney Brown have been re-elected in the primaries, but there is no doubt that they have been.

Honolulu Wholesale Produce Market

Quotations
ISSUED BY THE TERRITORIAL
MARKETING DIVISION
May 17, 1917.

SMALL CONSUMERS CANNOT BUY AT THESE PRICES
Island butter, lb. cartons 40
Eggs, select, doz. 45
Eggs, No. 1, doz. 43
Eggs, Duck, doz. 40
Young roosters, lb. 42 to 45

VEGETABLE AND PRODUCE
Beans, string, green 33 to 34
Beans, string, wax green 34 to 35
Beans, Lima in pod 33 1/2
Beans, Mani red None
Beans, Mani, cwt. None
Beans, small white None
Peas, dry, lb. cwt. None
Beets, doz. bunches 30
Carrots, doz. bunches 40
Cabbage, cwt. 3.00 to 3.50
Corn, sweet, 100 ears 2.50 to 3.00

Bananas, Cooking, lb. 75 to 1.00
Grapes, 100 1.00
Figs, 100 1.00
Lemons, lb. 15 to 12 1/2

LIVESTOCK
Cattle and sheep are not bought at Hogg, up to 150 lb. 13 to 14 1/2
live weight. They are slaughtered and Hogg, 150 and over 12 to 13
paid for on a dressed weight basis.

DRESSED MEATS
Beef, lb. 13 1/2 to 14
Mutton, lb. 18 1/2
Pork, lb. 18 1/2

HIDES, WET SALTED
Steer, No. 1, lb. 20
Steer, No. 2, lb. 18
Steer, hair clip 18

FEED
The following are quotations on feed, f. o. b. Honolulu:

Corn, sm. yel. ton 81.00
Corn, lg. yel. ton 81.00 to 85.00
Corn, cracked, ton 85.00 to 88.00
Bran, ton 58.00 to 60.00
Barley, ton 72.00 to 75.00
Scratch food, ton 90.00 to 95.00

WEEKLY MARKET LETTER
Eggs advanced three cents a dozen during the week but are yet very low in comparison with the high cost of feed. Chickens are not selling very fast at present, which is probably due to the fact that small growers are putting their stock on the market in large quantities and consumers are eating less expensive food.

Green vegetables are about normal in price and supply. Cabbage and tomatoes are exceptions. Although island onions have been advertised and all manner of schemes tried to sell them to dealers and consumers, the Division has not been able to dispose of half its supply. Onions with long hours run the gamut of outcrops, aphid, leaf hopper and unfavorable weather to get a marketable product, it is the duty of every consumer in these islands to see that man gets a sale for his goods at a reasonable price.

One of the greatest drawbacks to increasing the production of diversified agricultural products here in the past has been the preference shown for imported products by the local consumers. Now is the time to put the local producer on his feet by guaranteeing him a market. In the case of many products the imported article will keep better in storage than those locally grown and for this reason something should be done to hold up the sale of imported goods which are competing with perishable local products until the latter are sold.

At this time when the food commission, the army and other institutions are urging larger plantings of such staples as are imported into the islands, it would be a mistake not to take care of the crops now being produced. The man who produces a good crop that he cannot sell will not stay in the food producing business very long. He will devote his time to some other more profitable work and join the ranks of the consumers along with the rest and import his food. If he should grow enough food for his own use it is probable in case supplies could not be imported that he would have to share even that with the man who will not buy from him when he can import.

The only way the consuming public can be absolutely sure of having enough to eat during this war is to grow the food in the islands and the only way to get the food grown in to guarantee the producer a market. Every consumer must do his share.

"Accept no substitute" does not apply in Hawaii under present conditions at least so far as imported food is concerned. It should read "Substitute a Hawaiian product if available." Lines are plentiful and cheap and should be substituted for imported lemons, island Irish and sweet potatoes for imported Irish potatoes, island fruits for imported fruits and fresh island vegetable for imported canned and cold-storage vegetables.

The Division has recently received large quantities of vegetable seeds by field seeds such as beans, alfalfa and sorghum are very scarce on the main land and none was sent. Next week, however, some are expected and if people have living live stock to feed will go buy and plant instead of spending their time complaining about the high cost of feed they will be doing a service to the country and a duty to themselves.

A. T. LONGLEY,
Superintendent.

FATS ESSENTIAL IN DIET
Studies on the digestibility of some animal fats conducted by the Office of Home Economics, United States Department of Agriculture, indicate that chicken fat, goose fat, bristletail fat and fish fat are all well assimilated and that they are satisfactory sources of fat for the diet. Since butter fat, eaten in the form of cream, an egg-yolk fat are very thoroughly digested and easily obtainable and apparently contain or carry with them necessary food substances necessary in the diet for growth and general well-being, a wide use of these two fats in the diet is especially desirable.

Succulent vegetables of all sorts contribute bulk to the diet, and so are valuable from the standpoint of hygiene because within limits bulkiness is a favorable condition for normal digestion and also of importance in overcoming a tendency to constipation. They are also among the important sources of necessary mineral matters in the ordinary diet.

GREAT STATION FOR WEATHER WORK WILL BE ERECTED HERE

Plans For the Structure Include
the Most Modern of Scientific
Equipment

SCHEME PROPOSED BY LOCAL
EXPERT ENDORSED BY ARMY

Buildings and Plant Will Be Modelled
Upon the Famous
Omaha Institution

The second meteorological station in the United States for the gathering of data of the upper air will shortly be erected in Hawaii unless the plans of the army and of the weather bureau to erect a station here are abandoned. By a proposal presented by the local representative of the weather bureau, A. M. Hamrick, and enthusiastically endorsed by the army authorities of this department as electric-rod station from which will be flown the great kites which carry the instruments aloft is planned to be placed here as soon as practical. It will be modelled upon the similar station at Omaha, Nebraska, and will be the only station of the kind in the tropics, or semi-tropics.

One of the principal reasons for the adoption of plans for such a station here is to secure data for the aviation corps of the army which is about to install a squadron of flyers on Oahu and on whom such information is vital. The plan, as outlined by Mr. Hamrick, was to build a reel-house where an electric reel might be installed which would be used to haul in the big kites which are flown by the weathermen in gathering the data necessary for computing the strength and direction of the upper air currents.

It was stated in his letter to the war department that not a single station of the size and scope of that proposed for this place is now in existence in the tropics; the only information now recorded on the subject of the upper air currents in this part of the globe being that gathered by a much professor on the islands of Borvo, and this was gathered with his two apparatus, which was not complete.

Gen. R. K. Evans was in command of the department at the time Mr. Hamrick's letter was written. He saw at once the immense advantage that such a station would be to the aviation corps as well as to the artillerymen who have the big guns to fire, and he strongly recommended to the war department that they cooperate to the fullest extent with the weather bureau in the proposed work. After going through every department of the weather bureau and every bureau of the war department, Mr. Hamrick's letter came back to him with the report that every effort is to be made by both branches of the government to secure the establishment of the proposed station.

A statement to the effect that as soon as funds are available, the work on the plan for the station will begin. It is believed that the Meteorological Research Station will form a part of the equipment of the aero squadron and that visitors to Pearl Harbor and vicinity will soon see, not only aeroplanes navigating the blue, but great kites which will reach one, two and even three miles into the upper air, bearing barometers and other instruments by which the conditions of the air at these heights may be recorded.

Cooperation between the weather bureau and the aviation corps will not begin until the establishment of the station here; since 1914 the two departments have been cooperating at San Diego.

Some of the results of this cooperation were described recently by Mr. C. Edholm in the Scientific American. For many years the relations between the weather bureau and the air arm have been mutually helpful. This laboratory for the study of the upper air has secured information of the greatest value regarding air currents, their direction and velocities at levels up to twenty and one-half miles, as well as the temperatures encountered at various altitudes.

Doctor Carpenter, the weather bureau's Los Angeles representative, was one of the many "boosters" for San Diego when it was proposed to select a site for the permanent establishment of the government's aviation school.

North Island, the present site of the army's school, is located on San Diego Bay and is an ideal spot for the station to learn the flying game, not only because of its perfect climate, but also because of its topographical advantages.

Gradually the weather bureau and aviation school have come in touch, and now there is hardly a day without a conference between the officers, instructors and the forecaster. During the cross-country flights of April and May, 1916, forecasts of flying conditions were issued to the aviators. Special observations of wind, weather and fog conditions were made from the coast near Los Angeles, and from the weather bureau cooperative station at Mount Wilson Solar Observatory.

From the latter point, with an altitude of 8000 feet, reports of fog, heights were secured which were of particular value. This station commands a sweeping view of the coast from Point Fermin, overlooking Los Angeles harbor, to Point Loma on San Diego Bay. Knowing the different levels, the observer stationed on Mount Wilson was able to report the actual thickness and extent of the fog belt, its history for the previous twenty-four hours, and a satisfactory forecast regarding it.

OLIPHANT IS ELECTED
CAPTAIN OF BASEBALL
TEAM AT WEST POINT

(Associated Press By U. S. Naval Communication Service)
WEST POINT, May 20.—Oliphant was elected captain of the Army baseball team Saturday. This is an unusual honor for he already had been elected captain of the 1917 football team.

Oliphant is making a great athletic record at West Point, being the majority of the football team and one of the greatest players in America, and he also is a baseball star. He will not be graduated until next year. Prior to going to West Point he was a star athlete at Purdue University, Lafayette, Indiana.

SPORTS

SEALS TAKE TWO
FROM PORTLAND;
ANGELS WIN PAIR

Beavers Lose Six of Seven To
San Francisco; Salt Lake
Is Idle

PACIFIC COAST LEAGUE
San Francisco won a double-header from Portland in the Coast League yesterday, 3 to 4 and 3 to 1, and got a better grip on first place, which it recovered only Saturday, as Salt Lake and Oakland did not play at Salt Lake because of rain. Portland lost six of seven of the series to the Seals. It was about the worst setback the Beavers have had this season. Salt Lake won three of five from Oakland.

Los Angeles turned on Vernon and won a double-header, 9 to 1 and 5 to 1. Vernon won a double-header from the Angels Saturday. Los Angeles won four of six games from Vernon. Yesterday's two victories put the Angels back in sixth place. They had dropped to last Saturday.

No games are scheduled for today. Portland will open at Los Angeles Tuesday. San Francisco at Oakland and Vernon at Salt Lake.

YESTERDAY'S RESULTS
At San Francisco—San Francisco 5, Portland 1; San Francisco 3, Portland 1; At Vernon—Los Angeles 9, Vernon 1; Los Angeles 5, Vernon 3.

At Salt Lake—Oakland, no game; rain.

GAMES TODAY
No games scheduled; teams traveling.

Boston Takes
Lead Again
In the American

Red Sox Beat Chicago, 2 to 1,
While Yanks Are Losing
One To Detroit

AMERICAN LEAGUE
Boston won a double-header from Chicago yesterday, 2 to 1 and 1 to 0, and took the lead in the American League. The Yankees lost one to Detroit, 1 to 0. The Red Sox have won only one game of three from the White Sox, however. They dropped to second place Friday and to third place Saturday. New York and Detroit have split to date, one game being a tie. The three leading teams are covered by fourteen points, and the New York Yankees are only one point ahead of the White Sox. The race between the three is fast.

St. Louis defeated Washington, 4 to 1, and went back to fifth place, from which it dropped when it lost to Washington Saturday. Washington has won two of three games.

Cleveland won a double-header from Philadelphia, 3 to 1 and 5 to 2, making the series stand two to one in favor of Cleveland. Philadelphia appears to be the same hopeless underdog.

There were no games in the National League yesterday. The American League teams will finish their present series today, but the National teams will not finish until tomorrow.

YESTERDAY'S RESULTS
American League
At St. Louis—St. Louis 4, Washington 1.

At Detroit—Detroit 1, New York 0. At Chicago—Boston 2, Chicago 1.

At Cleveland—Cleveland 3, Philadelphia 1; Cleveland 5, Philadelphia 2.

National League
No games scheduled.

ONLY THE WORLD
BEING DEMANDED
BY MIKE GIBBONS

All His Manager Wants For Darcy
Fight Is \$30,000 Plus
\$33,333

LES DARCY ILL
(Associated Press by Cable)
MEMPHIS, May 19.—Les Darcy, middleweight champion, who slipped away from Australia and was branded as a "slacker," is in a hospital here ill of pneumonia with complications. His manager, says Darcy's ring days are over. Darcy recently joined the aviation reserve.

PORTLAND, May 6.—"It will cost any promoter caring to stage a match between Mike Gibbons and Les Darcy \$30,000 for Mike's end, and he also must arrange things so we can get \$33,333 for our share of the moving picture rights," said Eddie Kane yesterday as he stepped off of the rattler from Vancouver, B. C. with his two world champions, Mike and Tommy Gibbons. "We spent six weeks in New York last January trying to get this Australian to talk reasonably, but could do nothing with him," went on Kane. "We got an offer of \$60,000 from one Milwaukee club, and Frank Mulken a promoter of the same city, offered us \$50,000. In both cases the sale of the pictures were arranged so that they would have brought \$100,000. The buyers were to have split the purse 50-50, and each was to get one-third of the money secured for the pictures. Mike's end of the \$60,000 offer would have amounted, therefore, to \$33,333. Jack Viocek and Harold C. Hamilton New York sporting writers, and myself went out to see Darcy at Goshen, New York. He then was being handled by Tim O'Sullivan.

O'Sullivan is a Jersey fellow, but we were forced to talk to Darcy. He insisted upon boxing twenty rounds but after I had convinced him that he would be better off financially if he boxed ten rounds, he finally agreed to box us in Milwaukee if we would sign up for a twenty round bout later. I agreed, but after all that Darcy backed out.

And they are peeved.
"He was afterwards barred by Governor Whitman, of New York, and other state officials have followed the New York Governor's action, although Darcy likely will be allowed to box now as he has joined the aviation corps of the United States Army."

Eddie Kane went on to say that he did not wish to infer that Mike Gibbons would be unreasonable in accepting offers to meet other contenders. He and the champion are merely peeved at Darcy for being so bullheaded.

LEGAL DOCUMENT PUTS
DENVER IN FOREIGN PARTS

Such Is Claim Made By Law
Firm In Court

Denver, Colorado, is in a foreign country, despite the fact that school children in Hawaii are taught otherwise. The statement is set forth in all the almanacs known to the legal profession in an answer to a civil suit filed in the circuit court. The astounding discovery was made yesterday when the defendant, through Andrews & Pittman, filed his answer to the complaint in the action of The Hendrie & Boltoff Manufacturing & Supply Company against Clinton A. Pedrie, defendant, and the Consolidated Amusement Company, garnishee. Here it is:

"That the rights upon which plaintiff's action is founded arise in a foreign country, to wit, the City of Denver, State of Colorado, United States of America," alleges the answer.

The defendant denies generally the allegations in the complaint and also invokes the statute of limitations which, he says, has intervened, the alleged debt being shown in the complaint to be more than six years old.

AUTO VIOLATES LAW
AND ENDANGERS LIFE

Grass violation of the traffic rules governing automobiles very nearly caused a serious accident, if not the death of a man, last night at the corner of Maunakea and King Streets. A King Street car had stopped at the corner to let off and take on passengers, and a big negro soldier stepped from the sidewalk to board it. Just then through the narrow space between the car and the sidewalk darted an automobile, No. 2189, driven rapidly and with no regard whatever for the lives of those who might be in the way. The soldier saved his life by a remarkably quick leap back to the sidewalk just as the car was upon him. The automobile continued without slackening speed. Automobile No. 2189 is listed under the name of Mabel C. Phillips. There were two women in it last night.

RADIO TARIFFS TO BE CUT JUNE FIRST

According to a statement made last night by Manager L. W. Branch of the local naval communication office, the tariff on messages from shore to ship and vice versa, will be cut, commencing June 1, four cents a word.

This will make a uniform rate of eighteen cents per word, the naval rate being six cents, and the steamship rate eight cents per word.

Eight cents per word is the rate agreed on by steamship companies, and the new naval rate will obtain everywhere, making a uniform rate for this class of messages.
